VIDEO TUTORIAL

1. print out the templates and cut them out.
2. transfer the cut-out templates to the respective paper and cut them out
3. mark the black dots with a pencil. Place the eyelet setter or cut a small hole with scissors or a scalpel.
4. glue all parts together and attach the limbs with the fancy brads.

Tip:

You can print out the templates with the pre-printed eyes and messages as in point 1 and glue them directly onto them. That way you don't have to draw them yourself.
